

Community Corrections Adult Offender Population  
Fiscal Year 2021 Statistical Summary

**Jeff Zmuda**  
*Secretary of Corrections*

**Hope Cooper**  
*Deputy Secretary Juvenile and Adult Community-Based Services*

## PREFACE

This report provides a detailed statistical summary of adult offenders supervised under the Kansas Community Corrections system during fiscal year 2021. The number of offenders for whom information is available varies across data items. The data may differ from other reports published by the Kansas Department of Corrections because data was queried at different dates and/or times.

Unless otherwise noted, fiscal year 2021 data is for April 16, 2021 not year end of June 30th due to transition from legacy data systems to Athena.

# TABLE OF CONTENTS

SECTION I	Average Daily Population .....	4
SECTION II	Files Closed by Termination Reason.....	9
SECTION III	Files Closed by Supervision Level and Termination Reason.....	14
SECTION IV	Files Closed by Fiscal Year and Termination Reason.....	17
SECTION V	Sentencing Departures.....	23
SECTION VI	Graduated Sanctions.....	37
SECTION VII	Active Population .....	40

## SECTION I

### Average Daily Population

The data in Section I presents the average daily population (ADP) by agency and statewide for fiscal year 2021.

The data is presented in two sections of three tables each as described below.

***Monthly Actual ADP is the ADP average for that particular month.***

**Table 1** – Monthly Actual ADP by Agency

Johnson County – this number includes both AISP and Residential ADP

Sedgwick County – this number includes AISP, Drug Court, and Residential ADP

**Table 2** – Monthly Actual ADP for each Residential Center

**Table 3** – Monthly Actual Absconder ADP by Agency

Johnson County – this number includes both AISP and Residential absconders

Sedgwick County – this number includes AISP, Drug Court and Residential absconders

***Twelve Month ADP is an ADP averaged over the last 12 months.***

**Table 4** – 12 Month ADP by Agency

Johnson County – this number includes both AISP and Residential ADP

Sedgwick County – this number includes AISP, Drug Court, and Residential ADP

**Table 5** – 12 Month ADP for each Residential Center

**Table 6** – 12 Month Absconder ADP by Agency

Johnson County – this number includes both AISP and Residential absconders

Sedgwick County – this number includes AISP, Drug Court and Residential absconders

At the end of Section I is a graph which shows the statewide ADP at the end of each fiscal year from 2017-2021.

## SECTION II

### Files Closed by Termination Reason

The data in Section II presents how offender files were closed by agency and statewide in fiscal year 2021 as follows:

**Table 1** presents the data by termination reason.

**Table 2** presents the data by termination reason and gender of the offender.

**Figure 1** presents the total files closed by offender race.

**Figure 2** presents the total files closed by offender race and termination reason (successful\* and revoked).

**Figure 3** presents the total files closed by offender age group.

**Figure 4** presents the total files closed by offender age group and termination reason (successful\* and revoked).

In **Tables 1 and 2**, you may notice that if you sum up all the agencies they will not equal the statewide total. Offenders may have multiple files closed during a fiscal year in multiple community corrections agencies. In these cases, an offender is counted once per agency but can be in more than one agency's total – in data terms, the offender can be duplicated. In the statewide totals the actual offender is only counted once regardless of how many agencies in which the offender had closed files – in data terms the offender is unduplicated.

\*K.S.A 75-52,112 defines "supervision success rate" as the number of offenders whose supervision is not revoked and remanded to the custody of the Department of Corrections. Therefore, in **Figures 2 and 4**, a number of closure types are included in the group of successfully closed cases. In addition to cases that were successfully closed, cases that were terminated due to the offender's death, the offender not being sentenced to community corrections, and cases that were unsuccessfully closed for any reason (closed by court, remanded to jail, etc.) were classified as successfully closed.

**Table 1: Number of Community Corrections Files Closed by Agency and Termination Reason**

## SECTION III

### Files Closed by Supervision Level and Termination Reason

The data in Section III presents how offender files closed by agency and statewide in fiscal year 2021 as follows:

**Table 1** presents the number of files closed by supervision level and termination reason (successful\* and revoked).

**Table 2** presents the percentage of files closed by supervision level and termination reason (successful\* and revoked).

The data is based upon the supervision level established by the offender's most recent risk assessment prior to termination.

Those identified as No Assessment are offenders who did not have a risk assessment completed during their time on supervision.

In **Tables 1 and 2**, you may notice that if you sum up all the agencies they will not equal the statewide total. Offenders may have multiple files closed during a fiscal year in multiple community corrections agencies. In these cases, an offender is counted once per agency but can be in more than one agency's total – in data terms, the offender can be duplicated. In the statewide totals the actual offender is only counted once regardless of how many agencies in which the offender had closed files – in data terms the offender is unduplicated.

\*K.S.A 75-52,112 defines "supervision success rate" as the number of offenders whose supervision is not revoked and remanded to the custody of the Department of Corrections. Therefore, in **Tables 1 and 2**, a number of closure types are included in the group of successfully closed cases. In addition to cases that were successfully closed, cases that were terminated due to the offender's death, the offender not being sentenced to community corrections, and cases that were unsuccessfully closed for any reason (closed by court, remanded to jail, etc.) were classified as successfully closed.

For individual districts, this table selects the highest ranked closure per person per district. People may appear multiple times if they have had multiple closures in multiple districts. Only the highest ranked closure in each district is counted.

For STATEWIDE this table selects the highest ranked closure per person. Only the highest ranked closure in each district is counted.

## SECTION IV

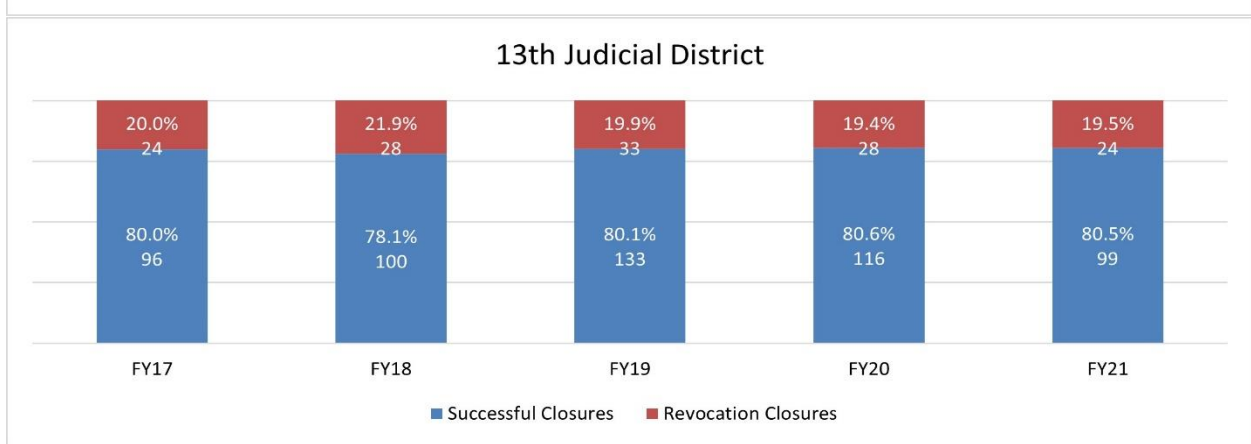

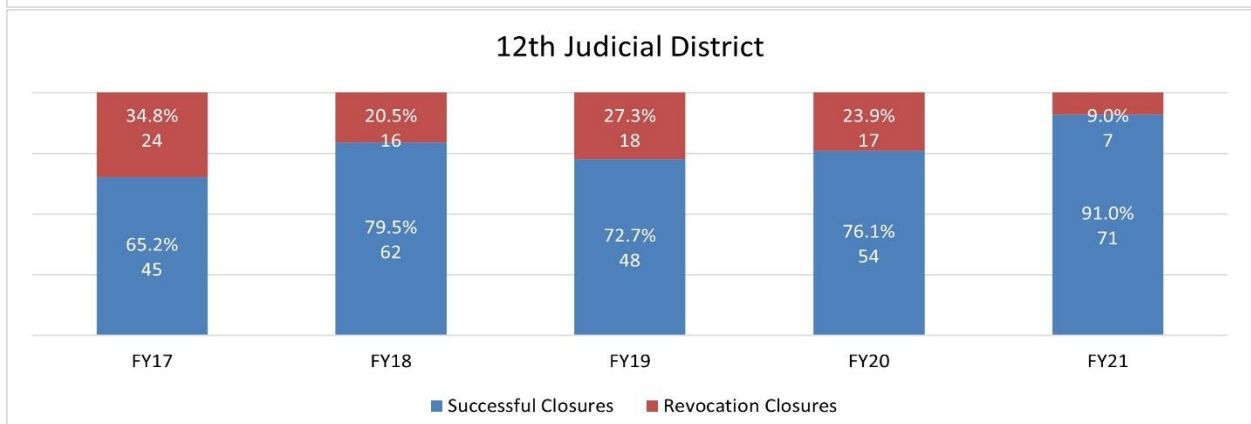

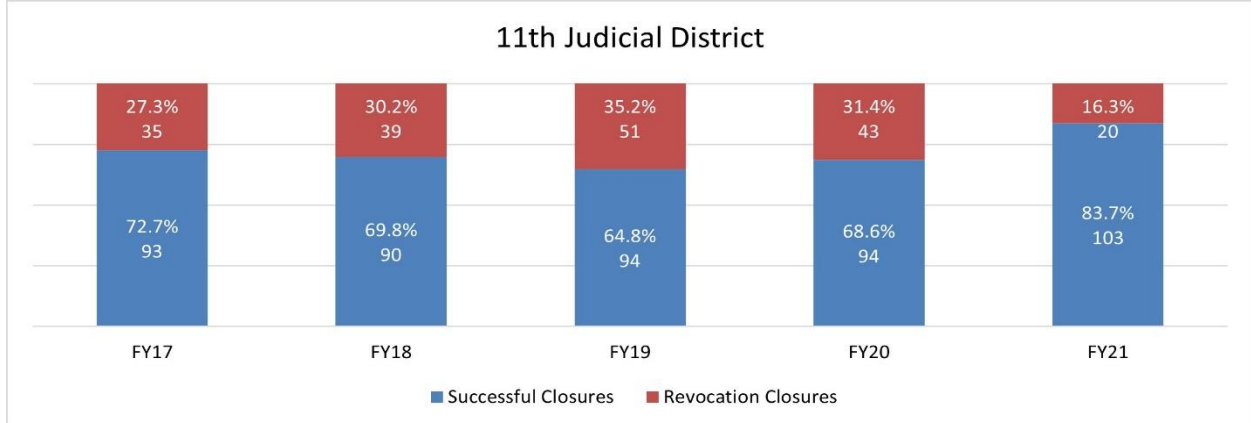

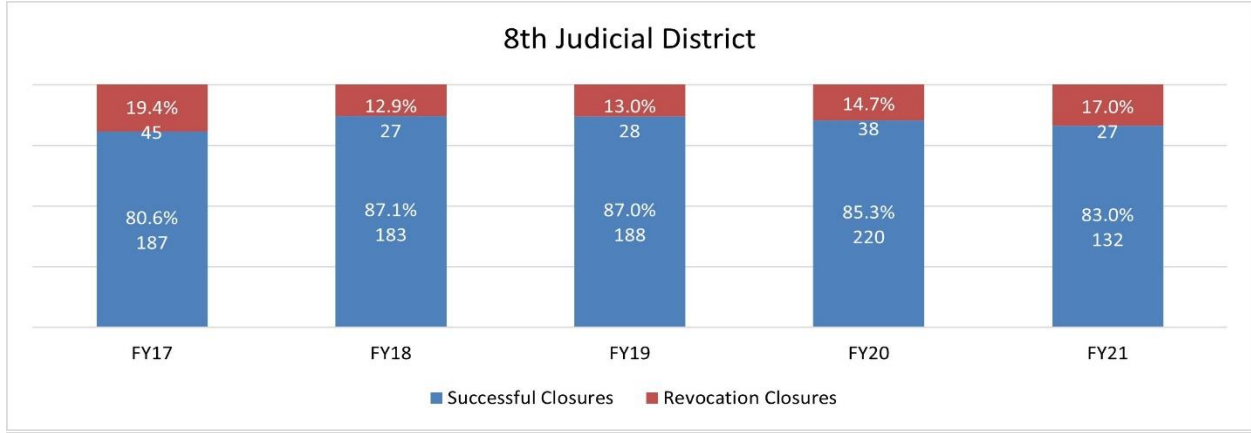

### Files Closed by Termination Type Fiscal Years 2017-2021

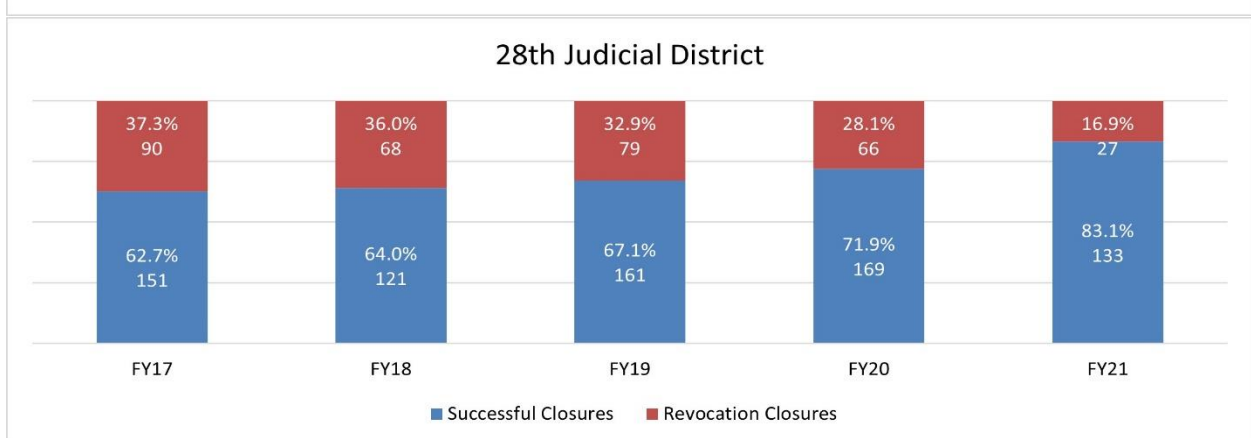

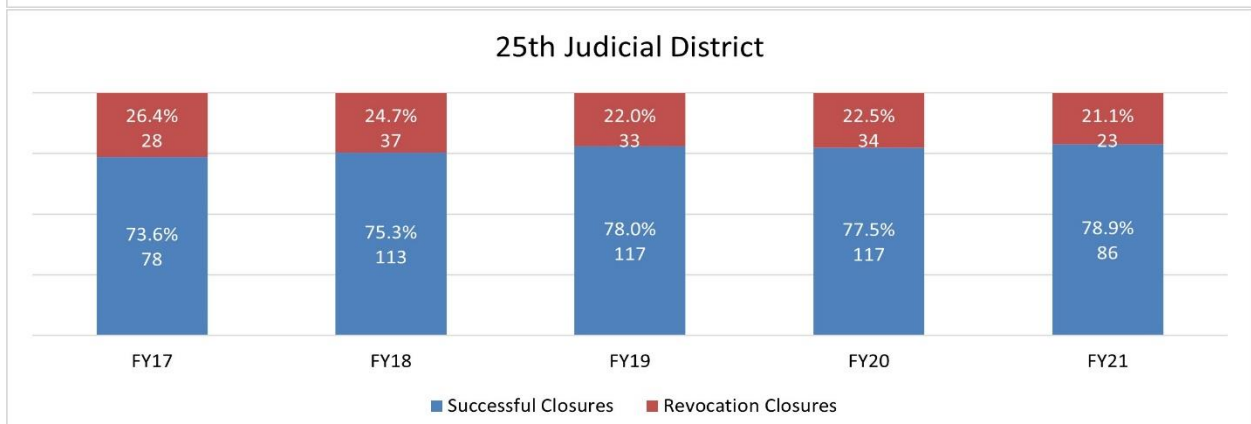

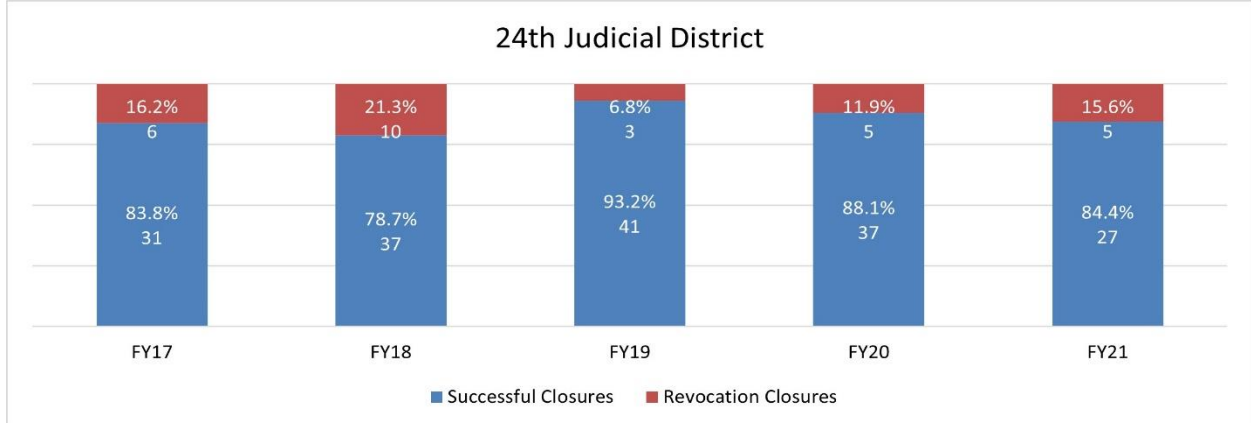

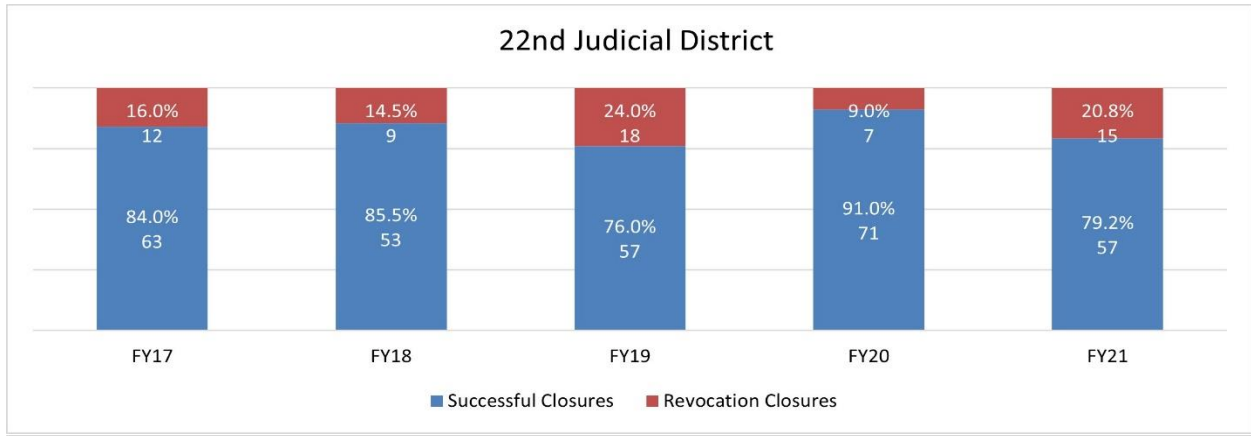

The data in Section IV presents how offender files closed by agency and statewide in fiscal years 2017 through 2021.

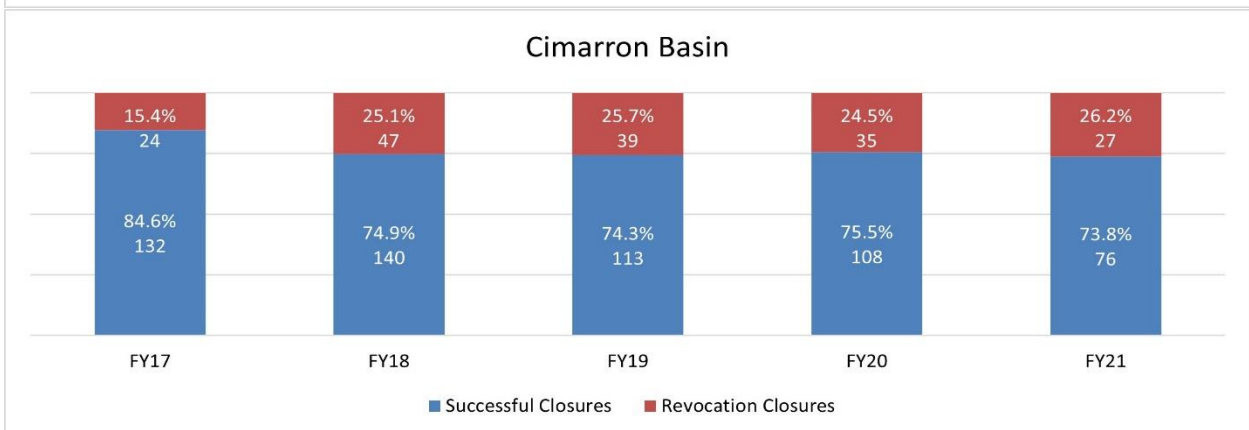

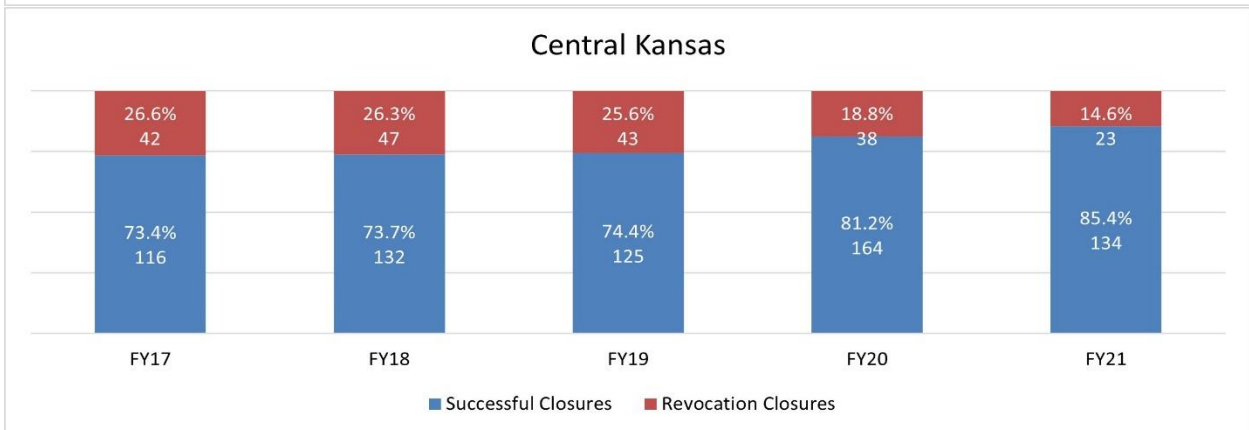

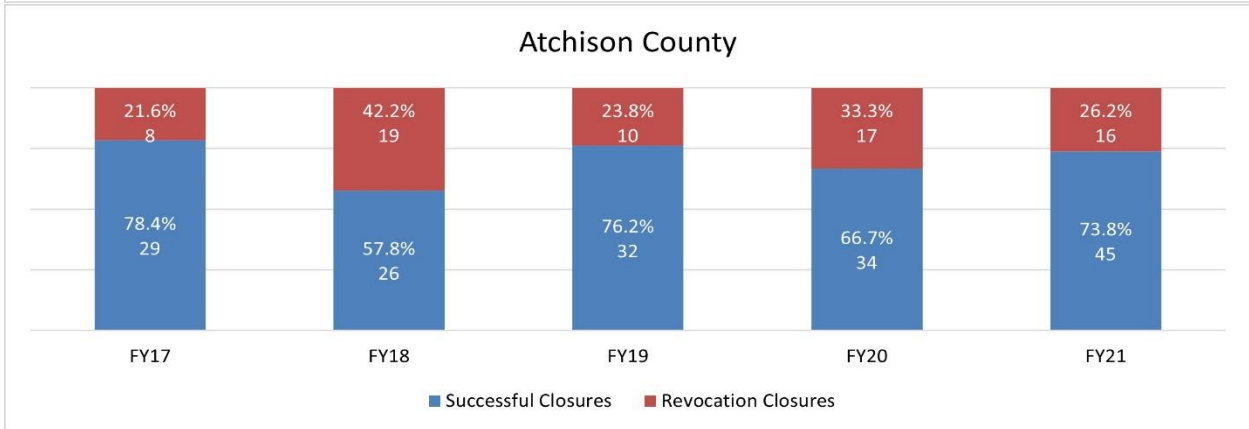

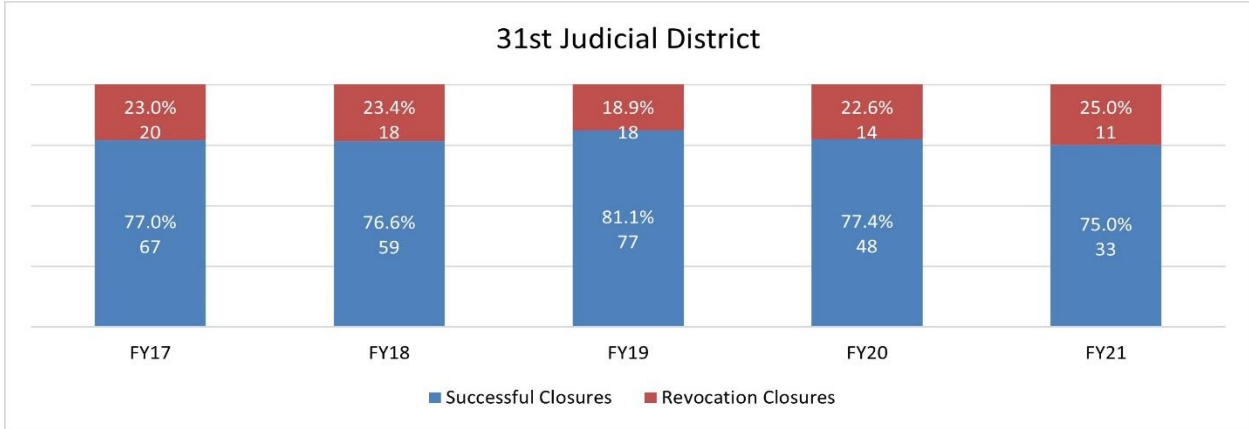

\*K.S.A 75-52,112 defines “supervision success rate” as the number of offenders whose supervision is not revoked and remanded to the custody of the Department of Corrections. Therefore, a number of closure types are included in the group of successfully closed cases. In addition to cases that were successfully closed, cases that were terminated due to the offender’s death, the offender not being sentenced to community corrections, and cases that were unsuccessfully closed for any reason (closed by court, remanded to jail, etc.) were classified as successfully closed.

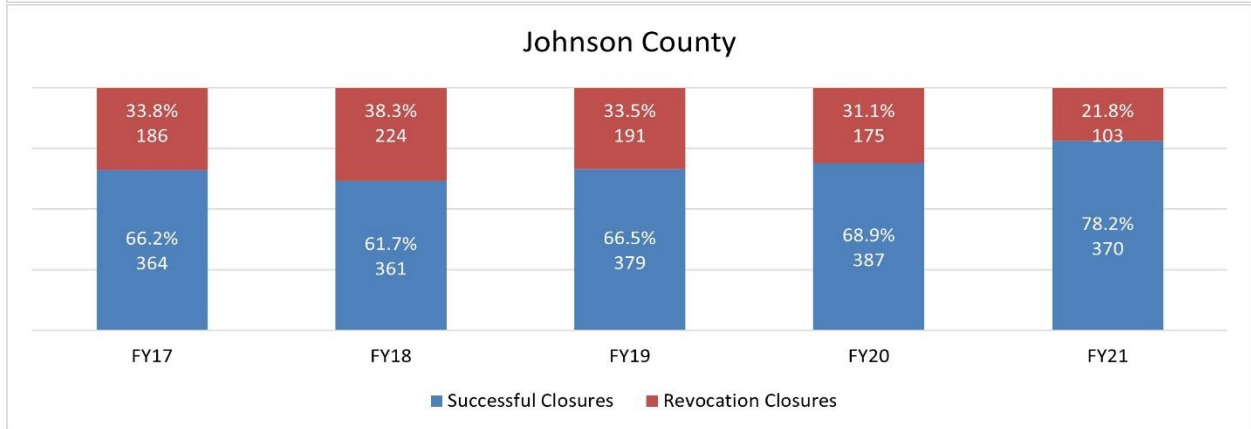

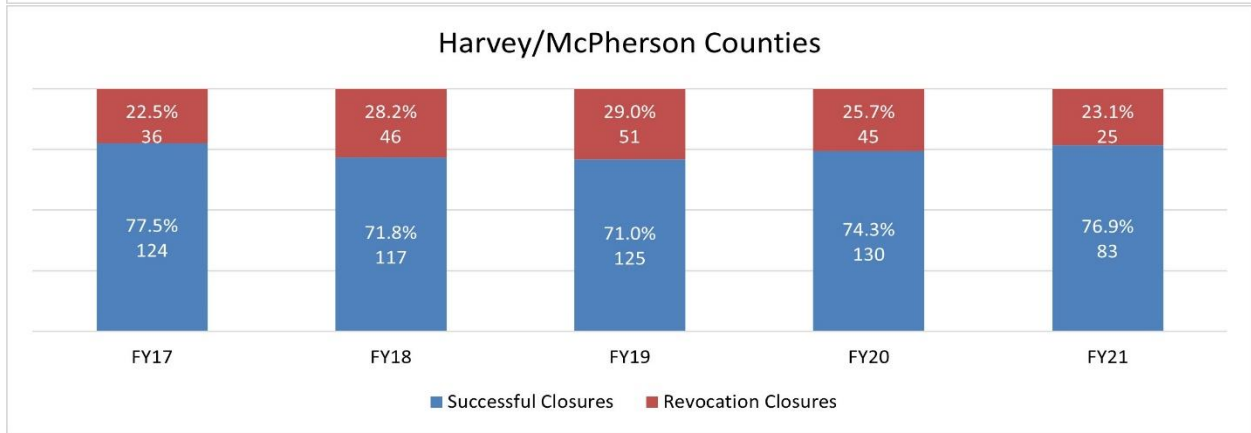

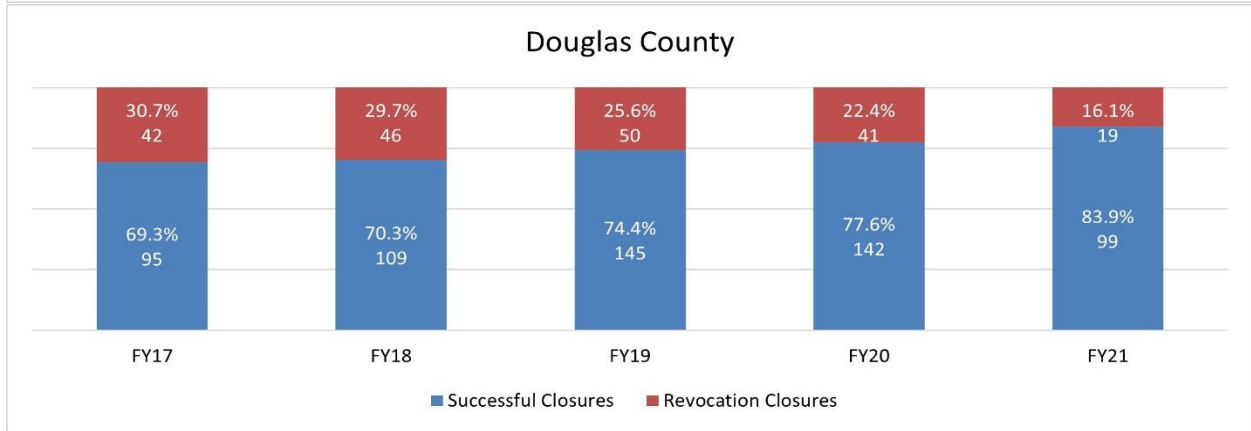

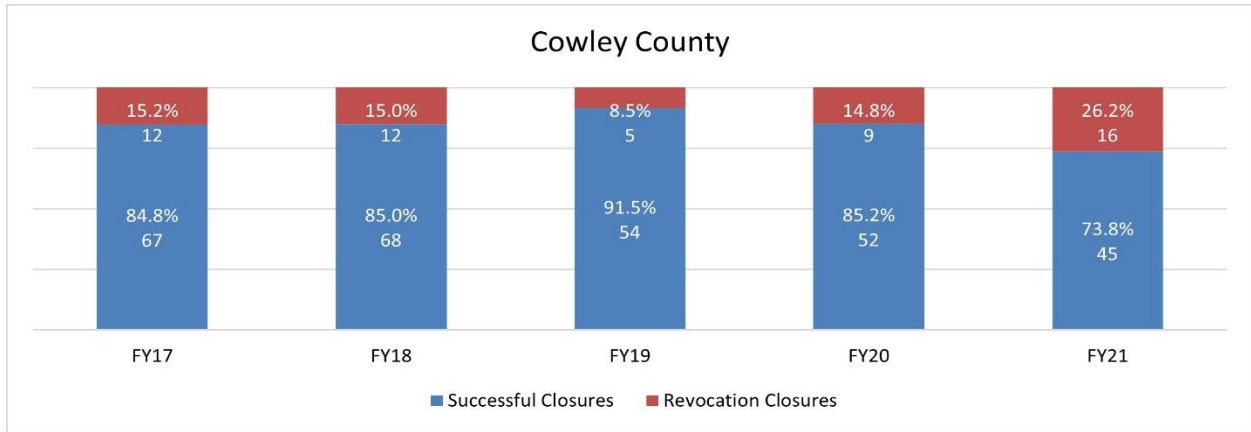

The group measuring revocation terminations is comprised of cases that were revoked due to a new misdemeanor, cases revoked due to condition violations, and cases revoked due to a new misdemeanor.

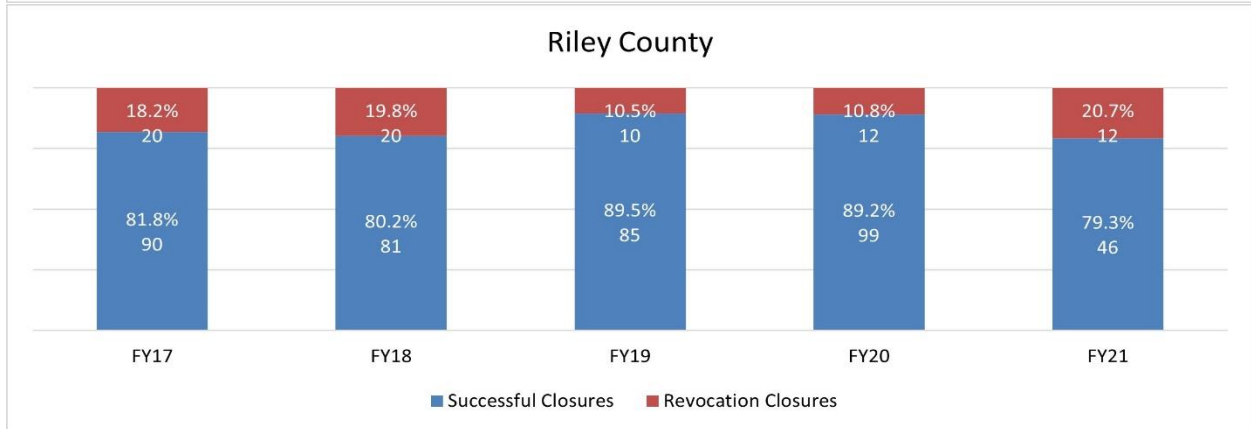

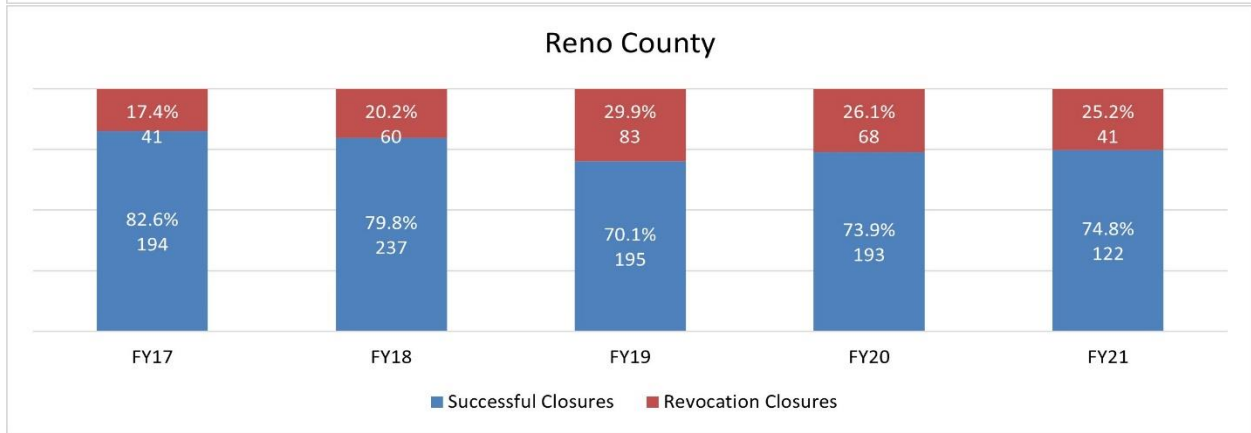

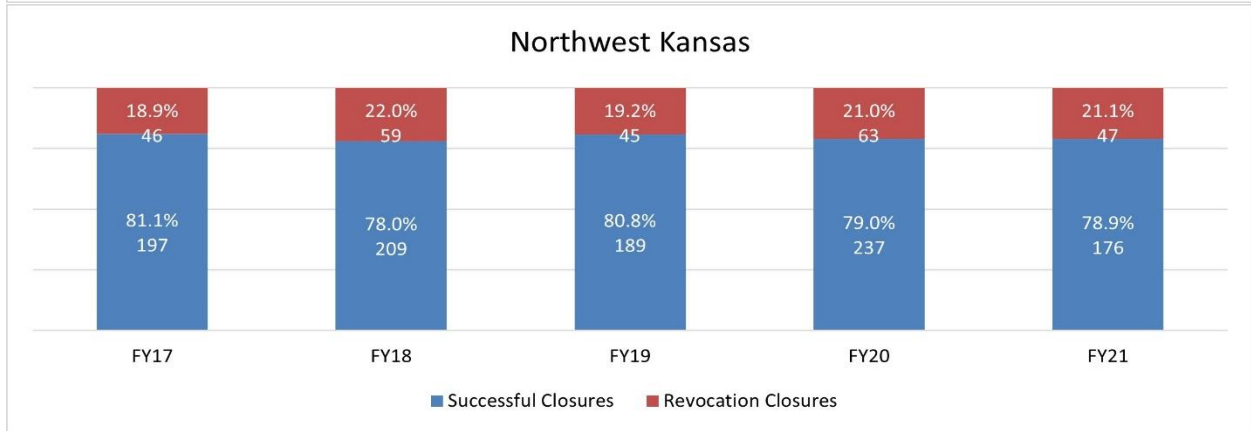

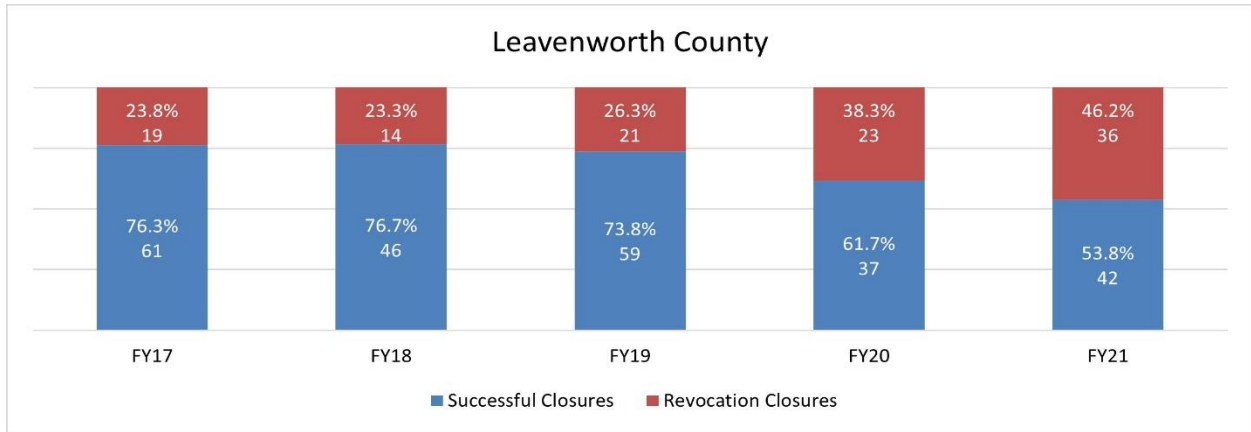

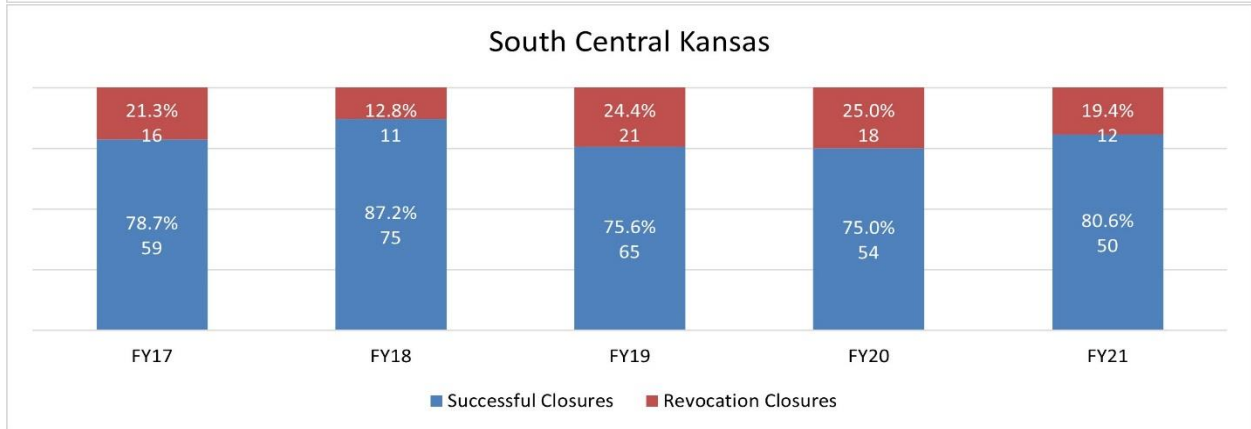

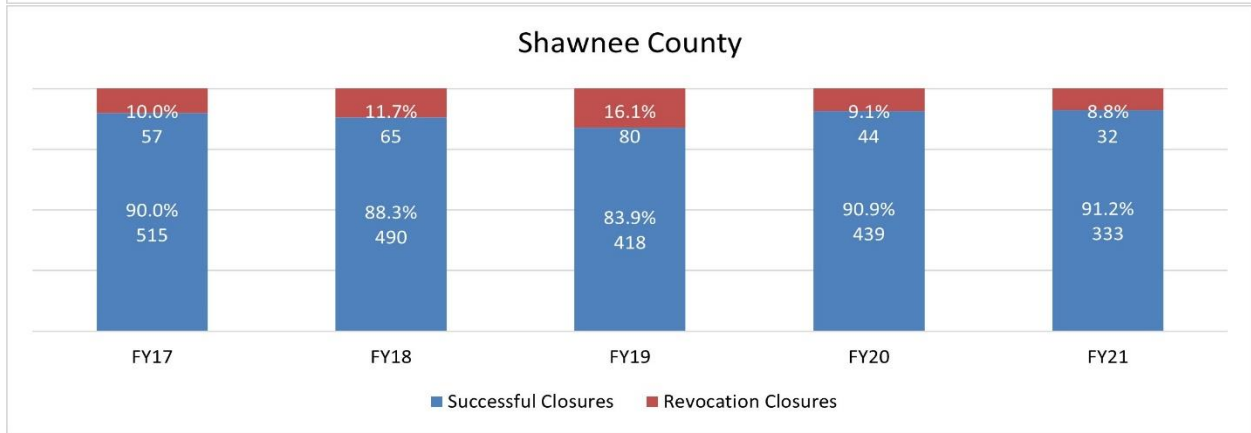

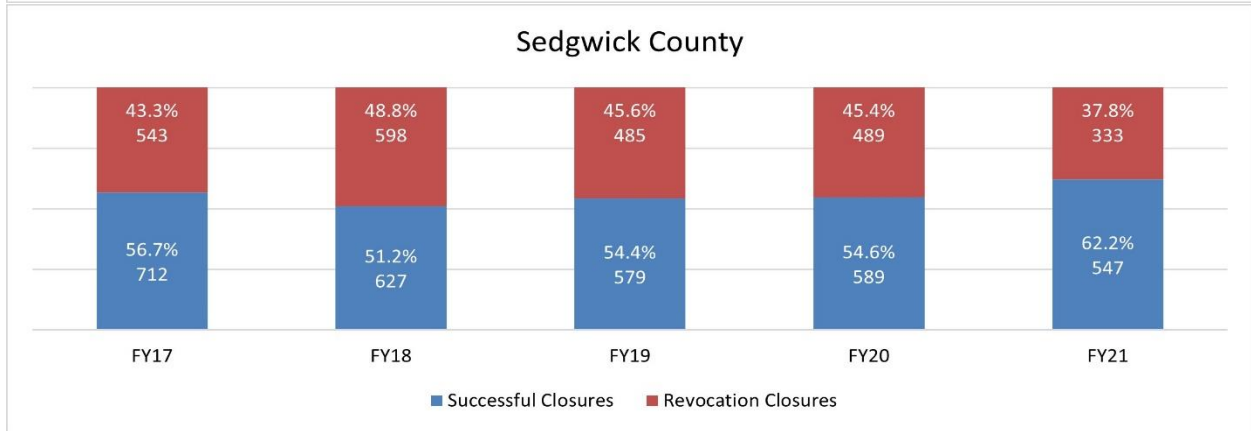

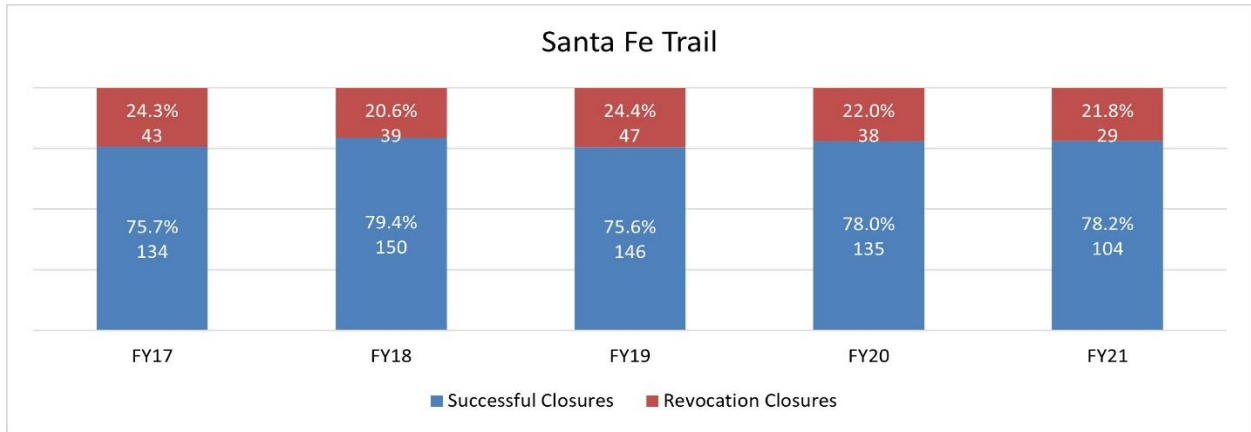

## SECTION V

### Sentencing Departures by Agency and Statewide

The data in Section V presents departure data for files closed and opened in fiscal year 2021 as follows:

**Table 1** presents the number of files closed by departure type and termination reason both by agency and statewide. The percentage of successful and revoked file closures represents each as a proportion of total files closed within each departure type.

**Individual Agency Charts** present the number of files closed by termination type and departure type. The percentage of successful and revoked file closures represents each as a proportion of the total number of files closed by the agency.

**Table 2** presents the number and percentage of files opened in FY2021 with one or more departure type by agency and statewide.

**Table 3** presents the number of files opened in FY2021 by departure type by agency and statewide.

#### Departure Types

Downward Durational: The sentencing court may depart downward to lower the duration of a presumptive sentence.

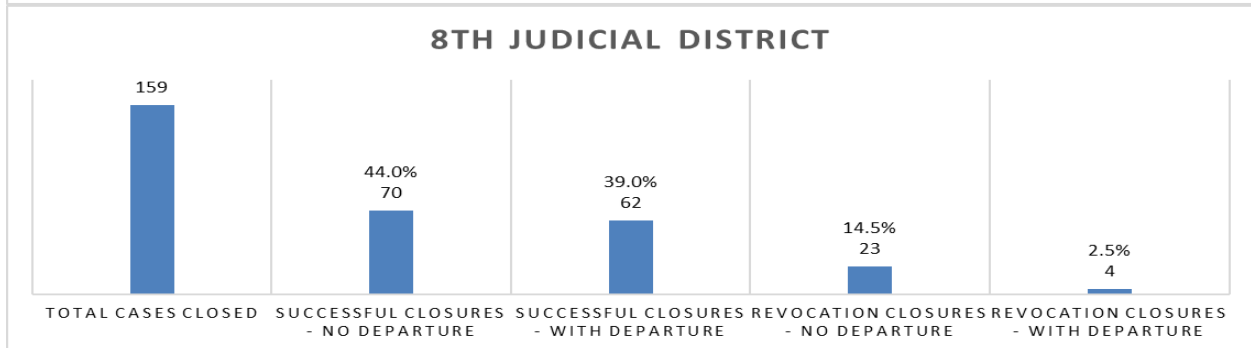

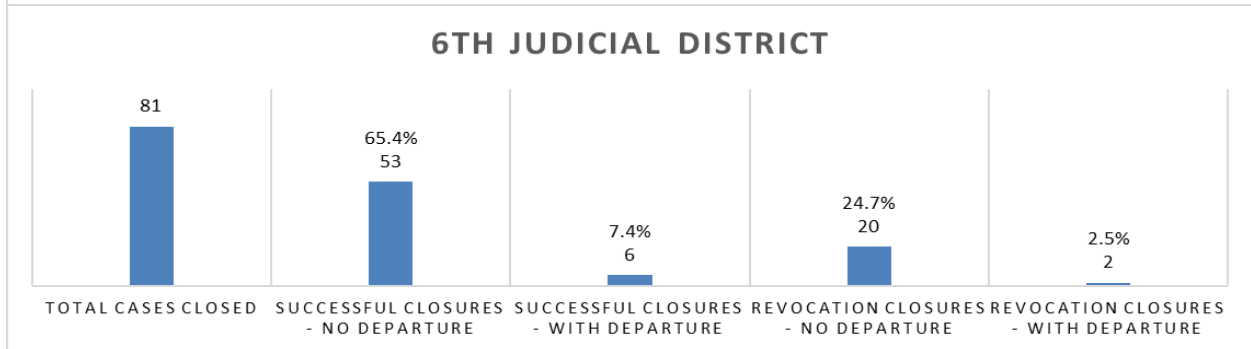

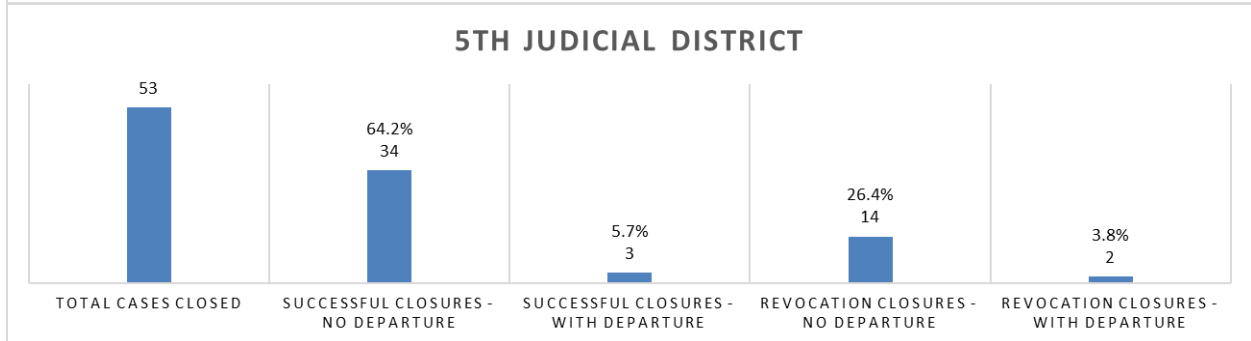

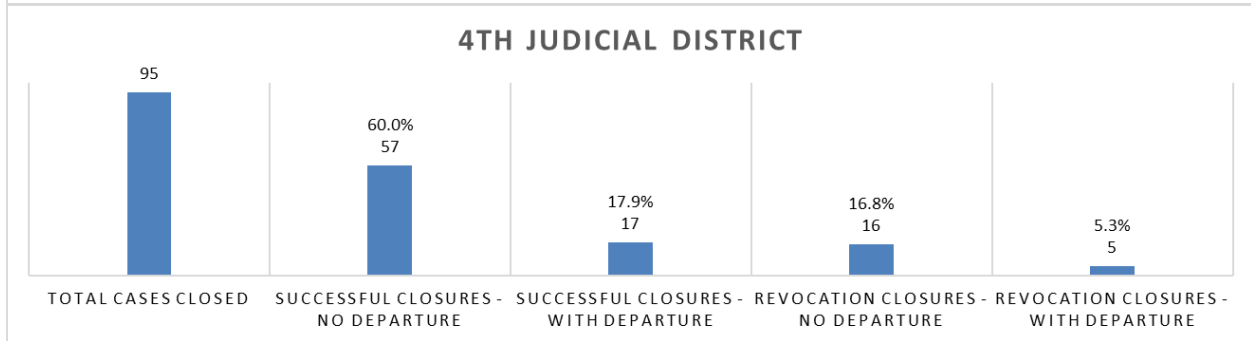

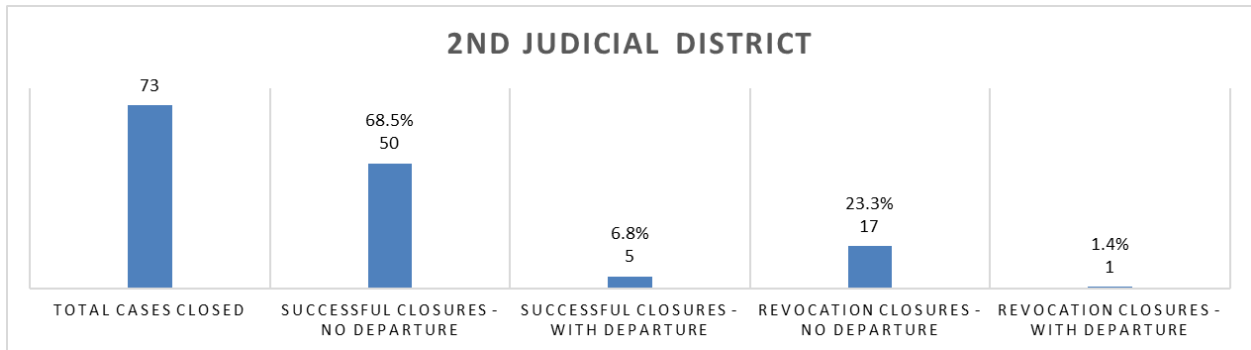

Downward Dispositional: The sentencing court may depart downward to decrease the type of supervision from prison to probation.

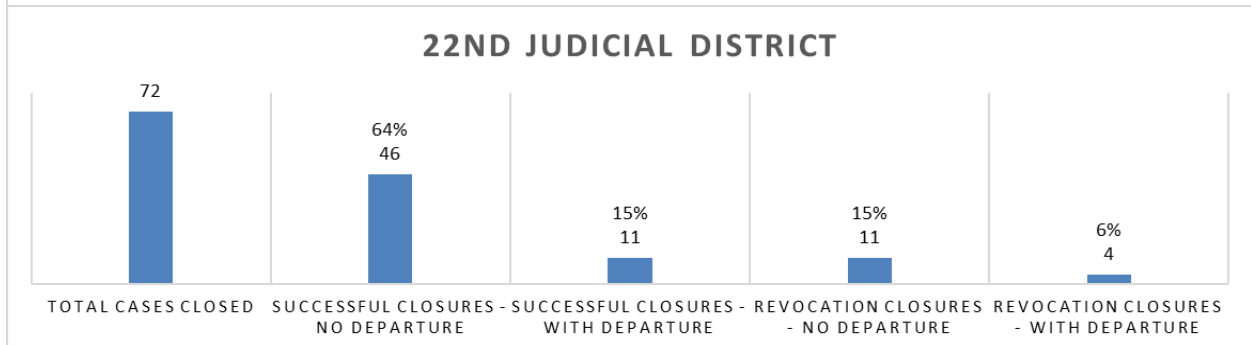

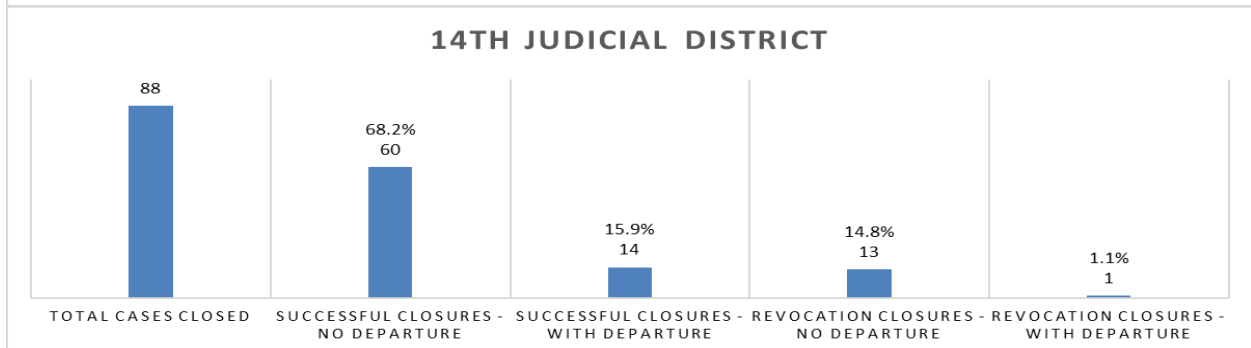

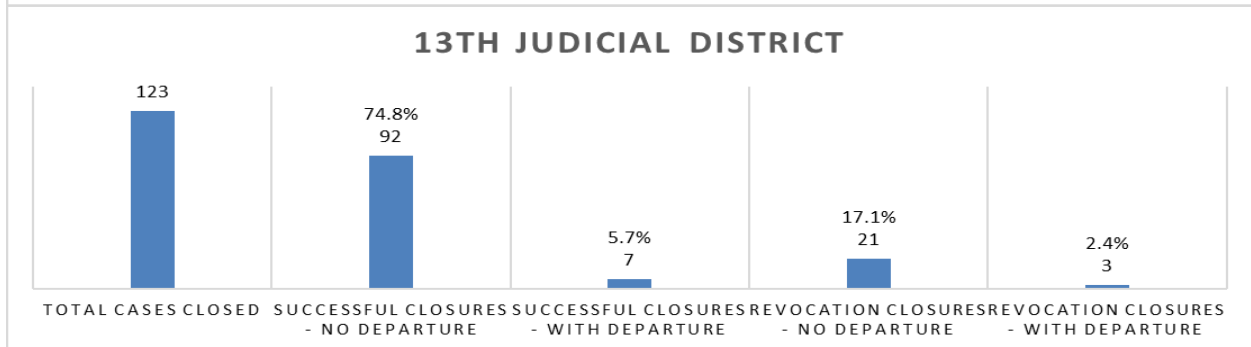

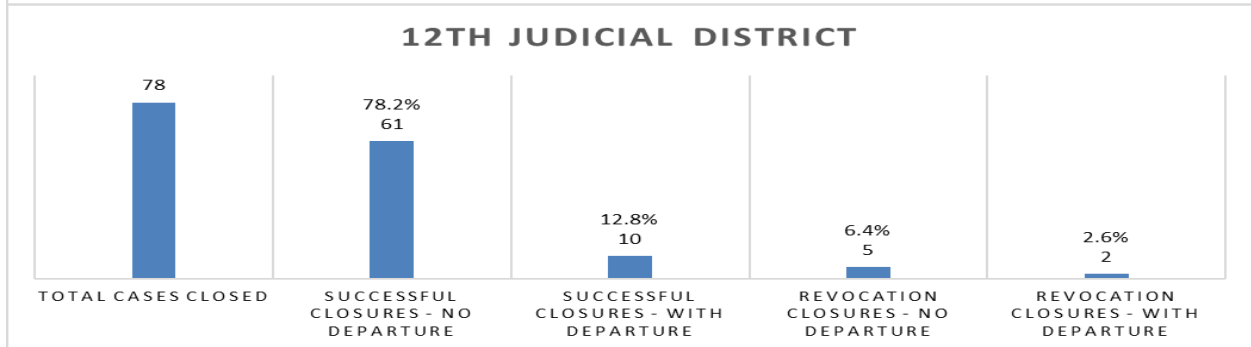

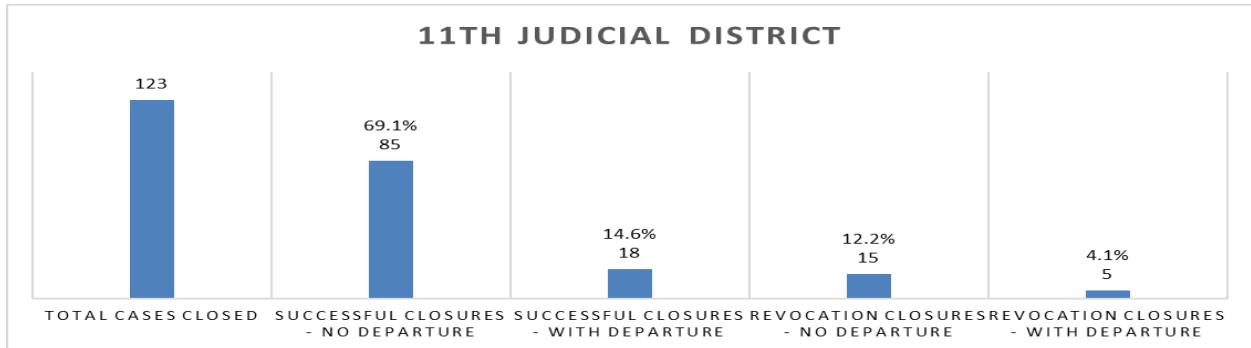

Upward Durational: The sentencing court may depart upward to increase the length of a sentence up to double the duration within the sentencing grid block.

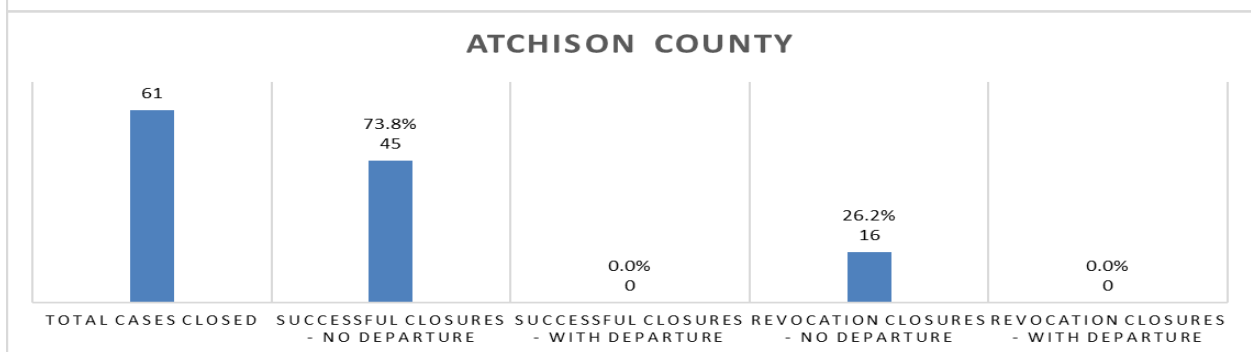

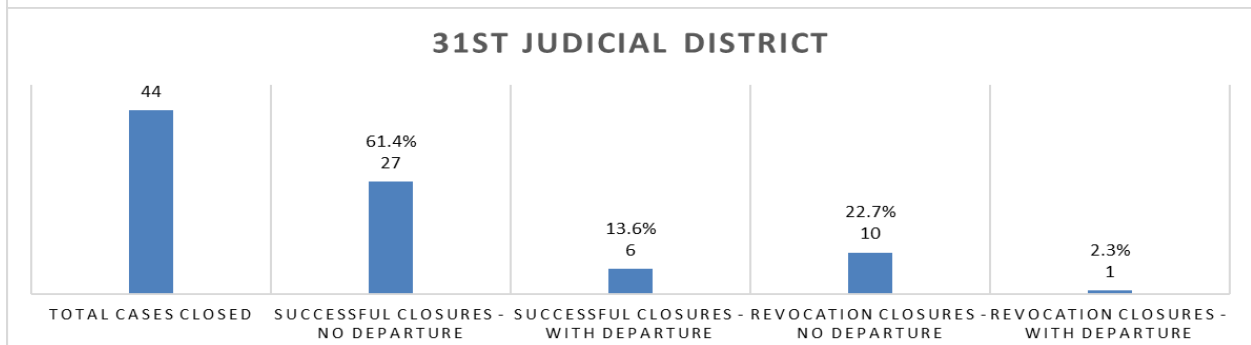

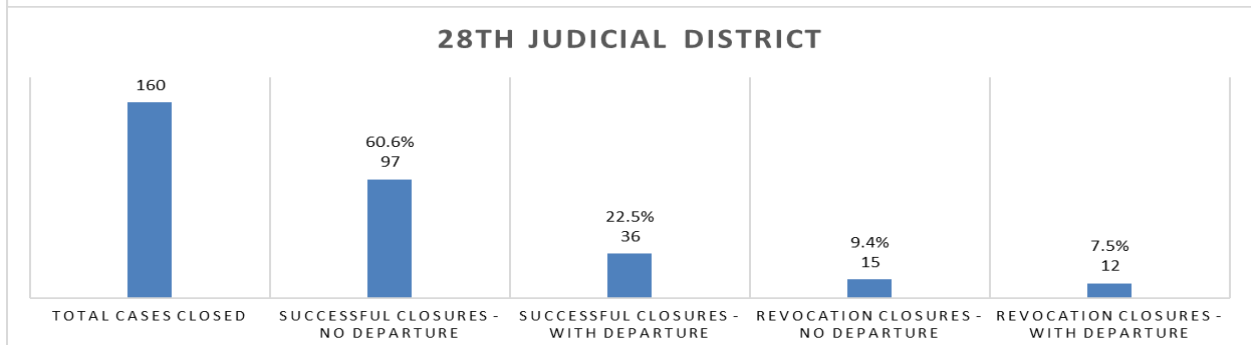

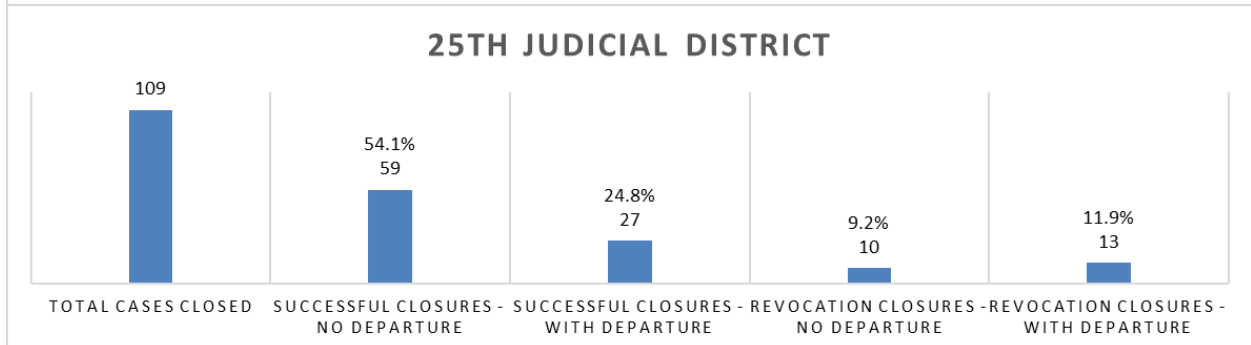

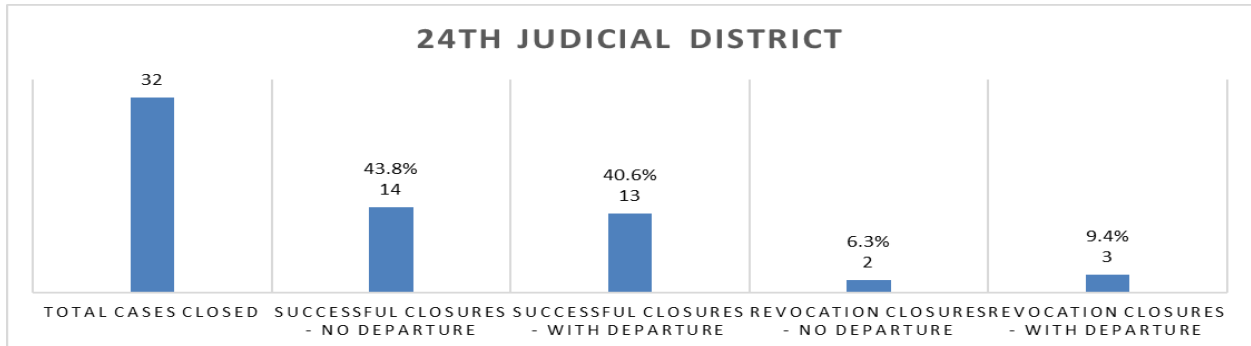

Upward Dispositional: The sentencing court may depart upward to increase the type of supervision from probation to prison.

\*Departures may be counted more than once due to multiple departure types.

\*\*These calculations reflect the total number of departures per type expressed as a percentage of the total cases

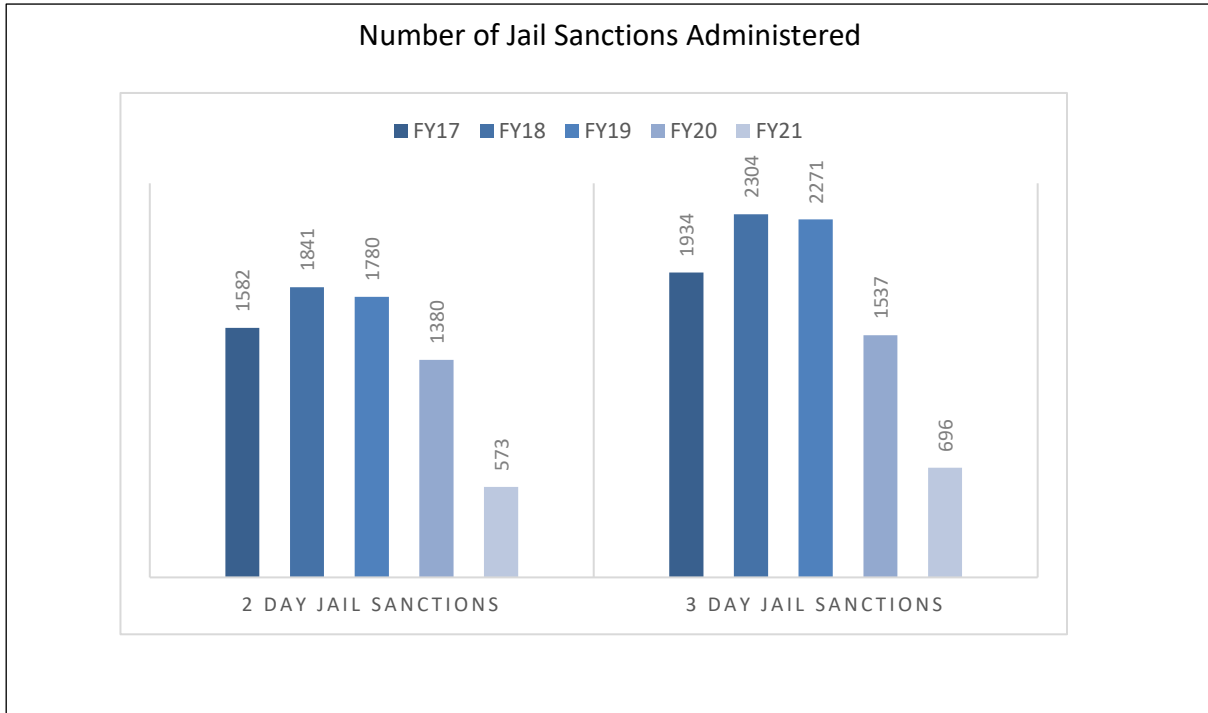

## SECTION VI

### Graduated Sanctions

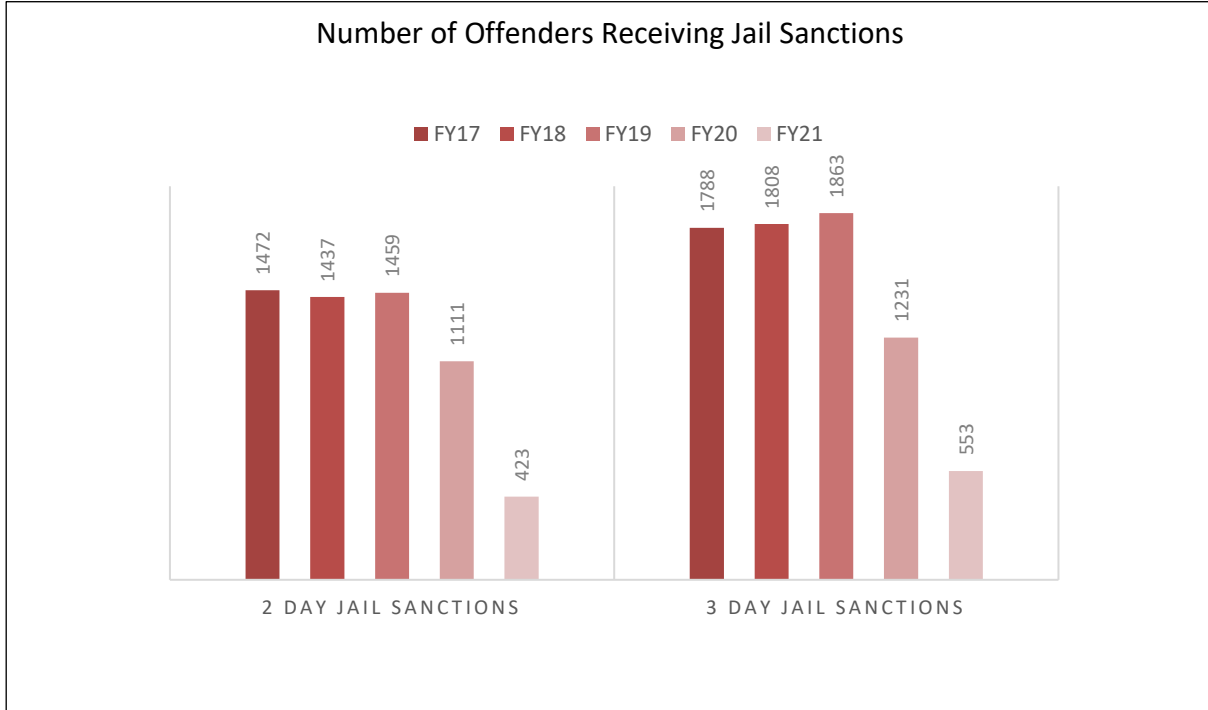

The data in Section III is a snapshot of graduated sanction utilization statewide for fiscal years 2017 through 2021.

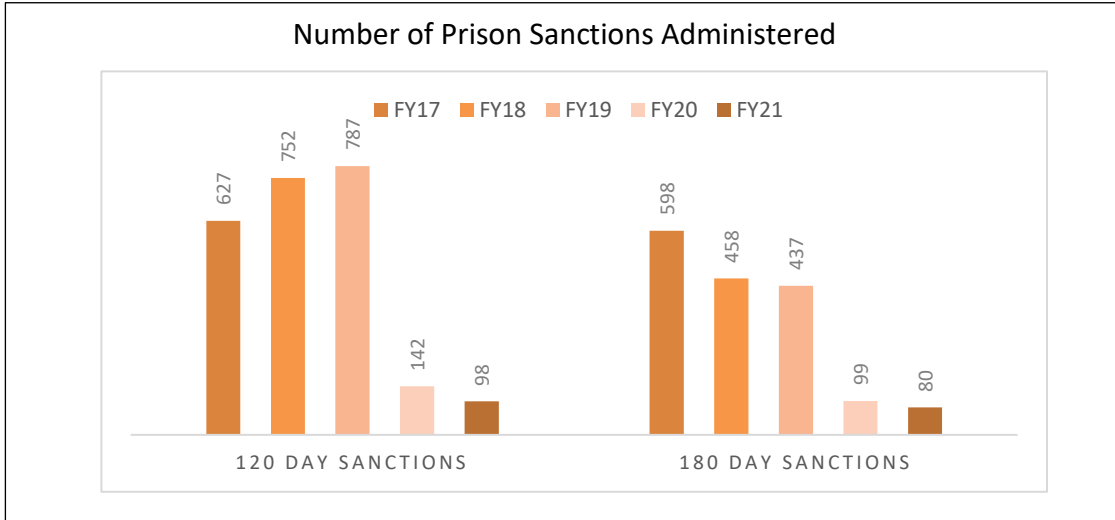

The **Jail and Prison Sanctions Administered** charts present the total number of sanctions entered into the TOADS database during the fiscal year. Offenders may be duplicated within this data as they can be ordered to serve multiple sanctions.

2019 SB 18 abolished the use of prison sanctions for offenses that occur after June 30, 2019. This legislative action resulted in a dramatic decrease in utilization of the prison sanctions. Use of these sanctions is projected to decrease to zero over the next 5 to 10 years.

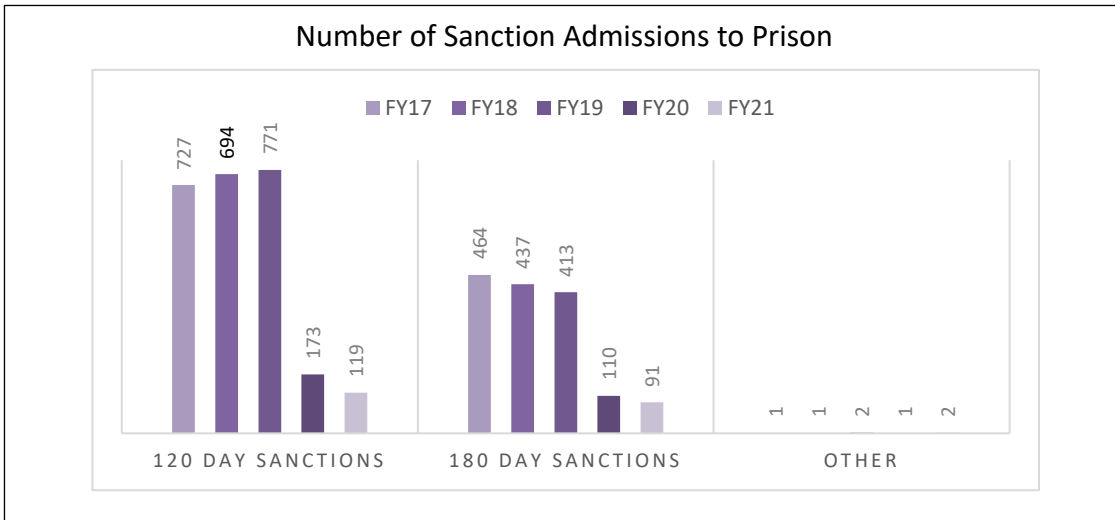

Number of Sanctions Administered = Total Number of 2- and 3-day sanction interventions entered in TOADS during each fiscal year

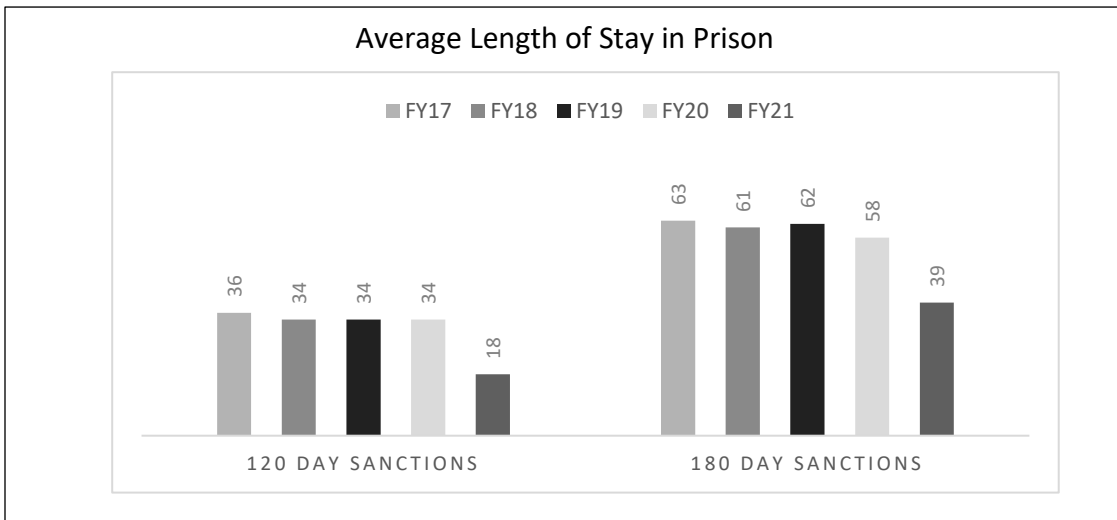

Number of Sanctions Administered = Total Number of 120- and 180-day sanction interventions entered in TOADS during each fiscal year

The number of Sanction Admissions to Prison may be larger than the Number of Sanctions Administered. This is due to some offenders admitted to prison being supervised by Court Services so their sanction data is not entered into TOADS.

## SECTION VII

### Active Population

Section VII represents the demographic and supervision (risk) level distribution for the community corrections population.

#### **Demographics:**

This data presents a snapshot of the active population as it appeared on April 16, 2021. It shows the population broken down by Gender, Race and Age for each agency and statewide.

#### **Supervision (Risk) Level Distribution:**

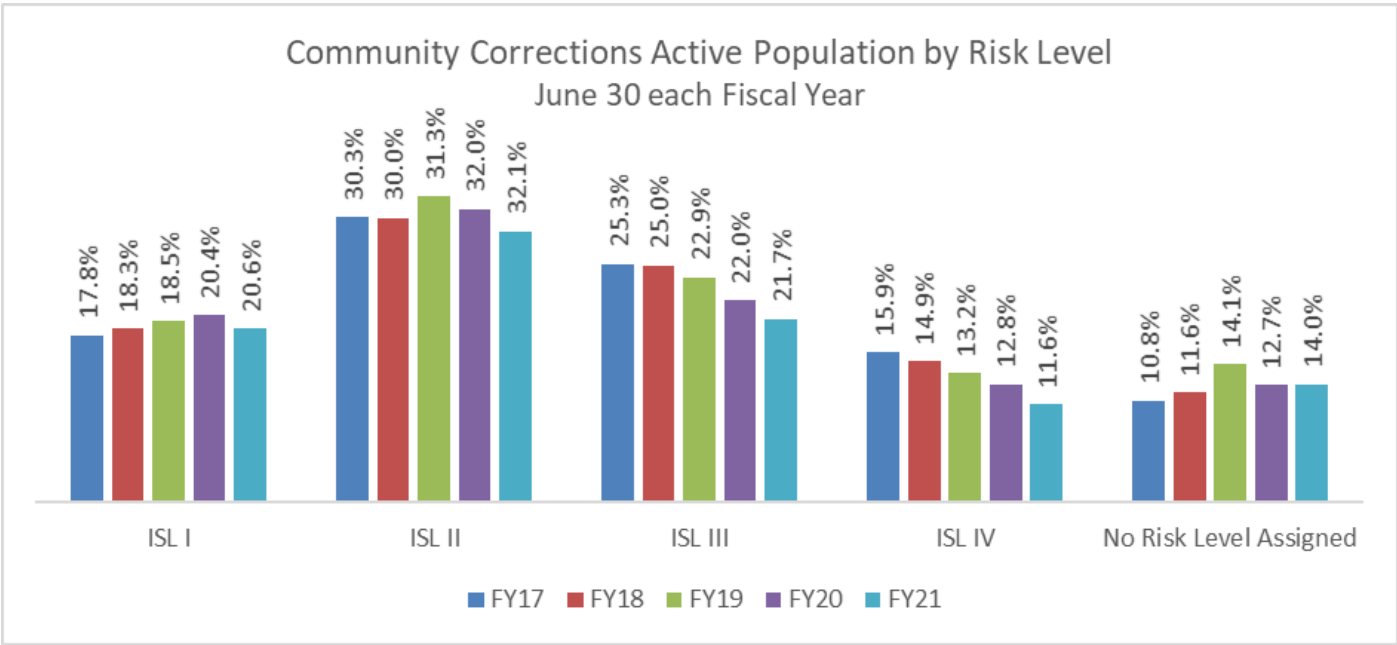

This data presents a snapshot of the active population by risk level as it appeared at the end of fiscal years 2017 through 2021.

### Demographics of Active Community Corrections Population as of March 30, 2021
