

Statistical Summary

FY 2013 Community Corrections Offender Population

KANSAS DEPARTMENT OF CORRECTIONS

COMMUNITY CORRECTIONS DIVISION

A safer Kansas through effective community collaboration and correctional practices

AUGUST 2013

Preface

This report provides a detailed statistical summary of adult offenders under the Kansas community corrections system during fiscal year 2013. The report is based on data pulled from the Total Offender Activity Documentation System (TOADS). The number of offenders for whom information is available varies across data items. The data may differ from other reports published by the Kansas Department of Corrections and the Kansas Sentencing Commission because this report reflects information for community corrections offenders only; captures different data elements; and is captured at different points in time. Each set of data is prefaced with a short description of content.

Fiscal Year 2013 Community Corrections Statistical Summary Data Index

Page	1	Title Page
Page	2	Preface
Page	3	Index
Pages	4 - 7	Section I: Average Daily Population for FY 2013
Pages	8 - 9	Section II: Number and Percentage of Community Corrections Offender Files Closed in FY 2013 by Agency and Reason for Closure
Pages	10 – 12	Section III: Number of Community Corrections Offenders with an LSI-R Score: Termination Reason by Supervision Level
Pages	13 – 14	Section IV: Number and Percentage of Departures by Agency and Statewide for FY2013
Pages	15 – 79	Section V: Number and Percentage of Community Corrections Offender Files Closed by Closure Type for Fiscal Years 2006 – 2013
		Section VI: Percentage of Initial LSI-R's by Risk Level; Most Recent LSI-R for Active Offender Population Closest to 12/31/12; Most Recent LSI-R for Active Offender Population Closest to 6/30/13

SECTION I: Average Daily Population for FY 2013

The first section of data consists of the average daily population (ADP) for the community corrections offender population. There are three types of ADP included:

Top Number: ADP average for that particular month.

YTD ADP: ADP averaged from the time the fiscal year started (the top number and this number will always be the same for July of each year since it's the first month).
Example: For September 2012 numbers, the number will be the average for July, August, & September.

12mo ADP: ADP averaged over the last 12 months. Example: June 2013 numbers, it looks at the ADP from July 2012 – June 2013 (12 months). The last month of each fiscal year (June) will always be the same as the YTD ADP (since June is the 12th month).

FY 2013 ADP (YTD & 12MO)

**SECTION II: Number and Percentage of Community Corrections Offender Files Closed in FY 2013
by Agency and Reason for Closure**

The data in Section II is a one page snap-shot of how offender files closed in fiscal year 2013. Section II numbers will match Section III numbers. Information was pulled from the Court Case Sentencing Activity Report which was run on 7/15/13 at 6:52:52 AM.

You may notice that if you sum up all the agencies they will not equal the statewide total. This is because looking at the data from the agency perspective, offender files have the possibility of having more than one file during that particular time frame (meaning offender could be on supervision, completed, then back on within the same year) – in data terms, the offender can be duplicated (also found in Section III). But when it looks at the statewide summary it's just looking at the actual offender (even though it says offender files) – in data terms – unduplicated.

SECTION III: Number of Community Corrections Offenders with an LSI-R Score: Termination Reason by Supervision Level

This is a quick snapshot of the number of offenders LSI-R risk level by termination reason for all agencies and statewide during fiscal year 2013. The second page is the percentage of offenders LSI-R risk level by termination reason. Numbers were pulled from the Court Case Sentencing Activity Summary report (run on 7/15/13 at 6:52:52 am) and matched with numbers from the TOADS-Assessment file (assessment conducted closest to discharge). There will be several offenders who did not have an LSI-R supervision level. Also, offenders who were Not Sentenced to Community Corrections or who Died were not included in the LSI-R risk level data.

As stated for Section II, you may notice that if you sum up all the agencies they will not equal the statewide total. This is because looking at the data from the agency perspective, offender files have the possibility of having more than one file during that particular time frame (meaning offender could be on supervision, completed, then back on within the same year) – in data terms, the offender can be duplicated (also found in Section II). But when it looks at the statewide summary it's just looking at the actual offender (even though it says offender files) – in data terms – unduplicated.

*Numbers based on the most recent scored LSIR conducted to termination date

SECTION IV: Number and Percentage of Departures by Agency and Statewide for FY13

Data was pulled from the Court Case Departures Report (export to Excel) within TOADS for FY13 only. Please note that a departure may be counted more than once due to multiple departure types. There are several departure types but only the four most utilized departure types are included (as the report does not make a distinction between a Double Downward; Double Upward; or Up & Down departure).

The sentencing court may depart upward to increase the length of a sentence up to double the duration (**Upward Durational Departure**) within the sentencing grid block.

The court may also depart downward to lower the duration of a presumptive sentence (**Downward Durational**).

The sentencing court may depart upward to increase the type of supervision from probation to prison (**Upward Dispositional**)

The sentencing court may also depart downward to decrease the type of supervision from prison to probation (**Downward Dispositional**).

*A more in-depth explanation of departure types is available by request if needed.

The last two sections of the FY13 Community Corrections Statistical Summary will be presented by agency.

SECTION V: Number (first chart) and Percentage (second chart) of Community Corrections Offender Files Closed by Closure Type for Fiscal Years 2006 – 2013

Data consists of the number and percentage of offender files by termination reason for fiscal years 2006 through 2013 for each agency and statewide. On the left-hand side of the first chart, the fiscal year followed by an “N=”. The “N=” represents the total number of offender files closed during that fiscal year.

There is a third chart in this section that is slightly different from last year. It groups all Revocations into a Revoked category and groups the Successfuls, Unsuccessfuls, Death and Not Sentenced to Community Corrections offenders into a Successful category. On the Successful completion bar, there are two different lines: the solid line represents the agency’s goal for FY13; the dotted line represents the agency’s goal for FY14. If the bar is at or above the solid line, the agency met the 3% Successful increase or 75% Successful completion goal for FY13.

All information included in Section IV was pulled from the Court Case Sentencing Activity Report which was run on 7/15/13 at 6:52:52 AM.

SECTION VI: Percentage of Initial LSI-R’s by Risk Level; Most Recent LSI-R for Active Offender Population Closest to 12/31/12; Most Recent LSI-R for Active Offender Population Closest to 6/30/13

Data included in the first chart provides a breakdown of initially assigned risk levels. On the right-hand side of the chart there is an “N=” which is the number of offenders who scored at that risk level. The data only includes fiscal year 2013 and represents the number and percentage of offenders in each supervision level based upon the initial LSI-R assessment. Data was exported from the SB14 Planning Report run within TOADS on 7/18/13. The search criterion was for Assessment Dates between 7/1/12 - 6/30/13 and for Pre-Sentence/Initial LSI-R’s only.

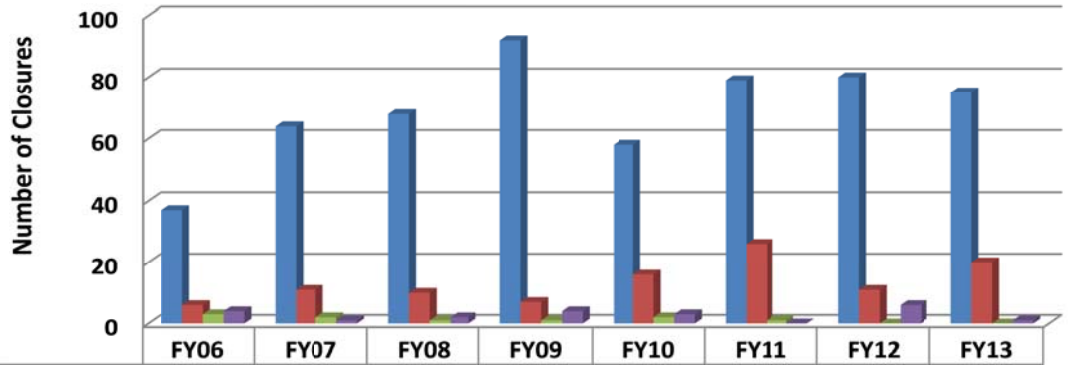

The next two charts represent the entire FY13 population which consists of four groups:

- Sentenced before FY13 and closed during FY13
- Sentenced before FY13 and are still open
- Sentenced during FY13 and closed in FY13
- Sentenced during FY13 are still open

These charts represent whichever LSI-R was closest to 12/31/12 and 6/30/13 for offenders meaning it could be a Pre-Sentence/Initial, Reassessment, or Discharge assessment. This means the overall numbers of LSI-Rs will be considerably higher as it is capturing all four groups. Data was pulled from TOADS Scored Assessment flat file and merged with the Status flat file on 7/18/13.

Atchison

Revoked = 28; Successful = 23

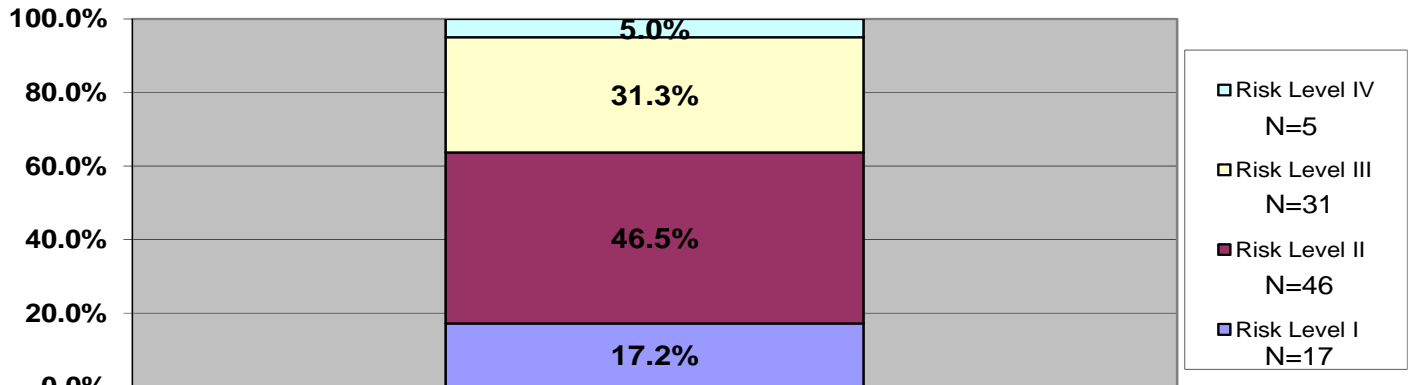

*Successful combines Successful, Unsuccessfuls, Death and Not Sentenced to Community Corrections. The solid line represents the agency's goal for FY13(71.6%). The dotted line represents the agency's goal for FY14 (48.1%). If the bar is at or above the solid line, the agency met their goal of either a 3% Successful increase or 75% Successful completion rate for FY13.

**FY 2013: Percentage of Initial LSI-R's by Risk Level
Atchison**

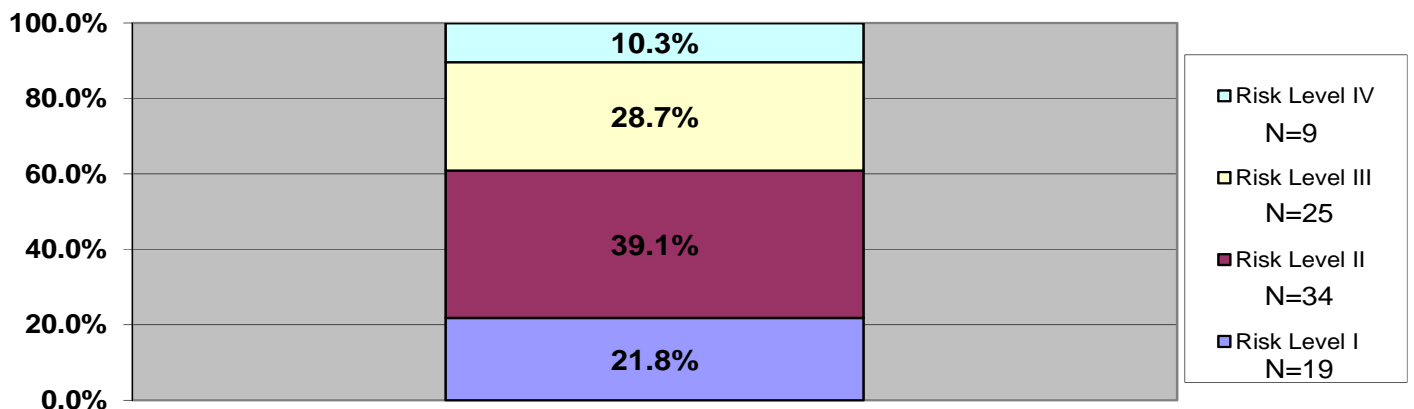

The next two charts represent the entire FY13 population which consists of four groups: Sentenced before FY13 and closed during FY13; Sentenced before FY13 and are still open; Sentenced during FY13 and closed in FY13; Sentenced during FY13 are still open. These charts represent whichever LSI-R was closest to 12/31/12 and 6/30/13 for offenders meaning it could be a Pre-Sentence/Initial, Reassessment, or Discharge assessment.
